

# SunSense<sup>SM</sup> Schools

## Your school could win a free solar panel installation.

**Be a part of Progress Energy's commitment to renewable energy and give your students a unique hands-on learning opportunity.**

Solar energy holds exciting potential for the future. Your school could be part of exploring and advancing that potential today – through the SunSense schools program.

### Unique Opportunity

This solar education program, the first of its kind in the Carolinas, is designed to give middle and high school students and faculty a unique, hands-on opportunity to learn more about solar energy. Five winning schools will receive a two-kilowatt solar photovoltaic system installed by Argand Solar on their campus along with Internet tracking equipment that shows the real-time energy output. Progress Energy is proud to partner with the Carolina Hurricanes' Kids 'N Community Foundation to bring this exciting opportunity to local schools.

**Win a free solar panel for your school!**

Panels installed at Harris Visitor Center by Argand Solar. Panels at winning schools may differ.

### SunSense: Capturing the power of the sun

SunSense programs are Progress Energy's comprehensive approach to solar energy, including residential and commercial incentives, educational opportunities and utility-scale power generation. It's all part of our commitment to clean, reliable, affordable power for today and tomorrow.

Learn more about why solar makes sense at [progress-energy.com/sunsense](http://progress-energy.com/sunsense).

**Questions?** Contact the SunSense schools program at [PECSunSenseSchools@gmail.com](mailto:PECSunSenseSchools@gmail.com).

### Apply Today!

Your school must be served by Progress Energy to be eligible. Complete application details are available at [progress-energy.com/sunsense](http://progress-energy.com/sunsense).
