

Lower your energy bill.

Not your comfort level.

Progress Energy

People. Performance. Excellence.

Energy Management from Progress Energy

Looking for the comfort of a lower energy bill?

These days, everyone is looking for ways to lower their energy spending. With programs like Progress Energy's free Energy Management, it's easy to save energy and reduce your bills.

You can reduce your bill each month November through March. Simply sign up and we'll install free special equipment that can briefly suspend power to your heating system or hot water heater during times of peak community demand.* Most customers say they don't notice the short and infrequent suspensions. Yet you'll save energy and money.

So don't let rising energy costs bring you down. There's never been a better time to call Progress Energy to learn more about Energy Management and our many other energy-saving programs.
